

## If you can't get on using an **iphone**

Your phone settings may block cookies. If so, when trying to access Active Learn via your phone, you will see this:

You will need to allow cookies but this will vary by phone and by operating system:

**If using Google on an iphone** you will need to go to the **Google App**:

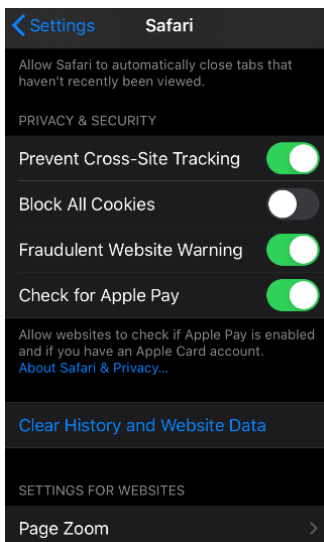

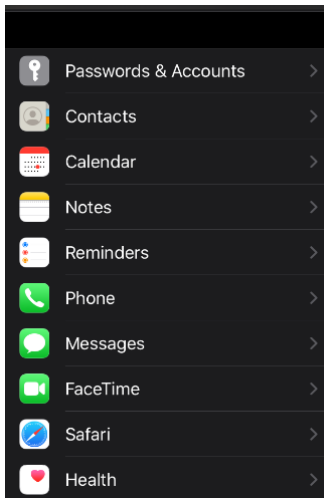

Within Settings, both Privacy and Content Settings need to be checked:

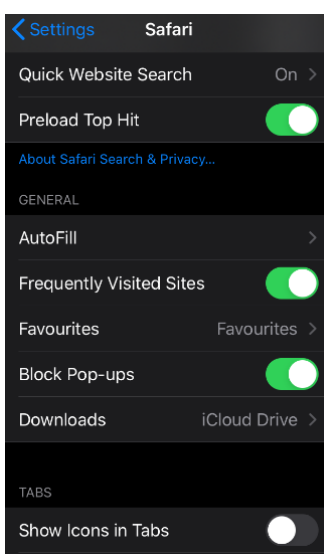

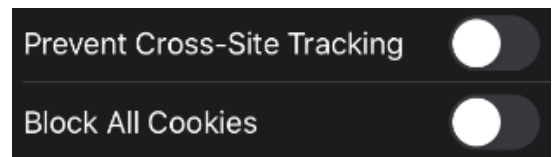

If you can't get on using an **iphone**

If using **Safari on an iphone** you will find that Safari is built into the phone settings (it isn't an App).

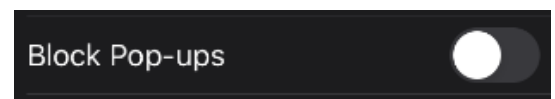

Go to the phone settings:

You need to turn BOTH of these off.

And this one.

Now, on an iphone, everything should work.
